DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 16 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 16 directs to information stored on a medium. Since the information do not provide any function interrelationship to the medium to control medium, read out the information and access the information, or impart to any software and hardware structural components to provide certain function that is processed by a computer, the information on the medium do not make them statutory. See MPEP 2100. It is noted that the body of claims contain only non-functional information and there is no means or circuit used for access and control the recited information. It is noted that in the body of claims, there is no recitation for any functions of the stored information, or means or circuit to interact with the stored information to provide certain function to control the medium or access the information.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim et al (6,421,499).

Regarding claims 16,17 and 18, Kim discloses a information recording method for recording data on a medium, said medium configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising:

a control information area for storing a still picture audio/video file information table including still picture audio/video file information for managing the still picture video object, original program chain information (Fig. 1)with which a whole of the still picture video object can be referred to by specifying first and last object numbers of the still picture video object (each program chain being defined by objects or cells), and

a user defined program chain information table (Figs. 1,3)) including user defined program chain information with which a part of the still picture video object can be referred to by specifying one or more object numbers of the still picture video object, wherein said still picture audio/video file information includes group information of the

still picture video object, said group information includes entry information of the still picture video object; and a data area for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream (text stream) is included (column 2 lines 32-37), said method comprising: recording the audio/video data on the data area; and storing the control information on the control information area. (Fig. 1,3)

Further for claims 18 and 19, Kim teaches reproducing the data from the recording medium (column 2, lines 40-60, Fig. 4).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/800,755 Page 5

Art Unit: 2616

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kageyama et al. teaches apparatus for recording still images.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
